

Today...

If you take 15 minutes of your time ... and ...

\$6.50 from your purse,

you will save a child's life.

By the time you have prepared and eaten dinner,
8 busloads of children will have died from Malaria.

Most of the survivors will be permanently ill or brain
damaged.

It is preventable

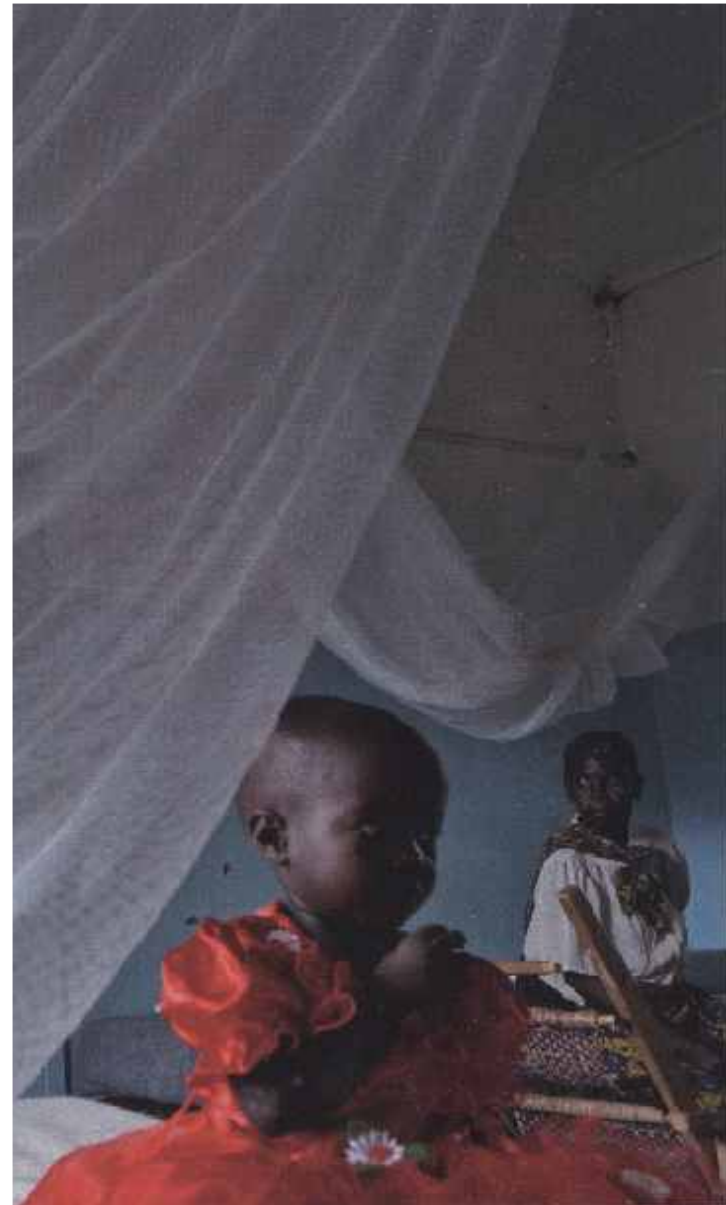

The **best prevention** is LLIN

(Long Life Insecticidal Nets)

\$6.50 buys a net

100% of donations is spent on the nets

guaranteed over heads and beds

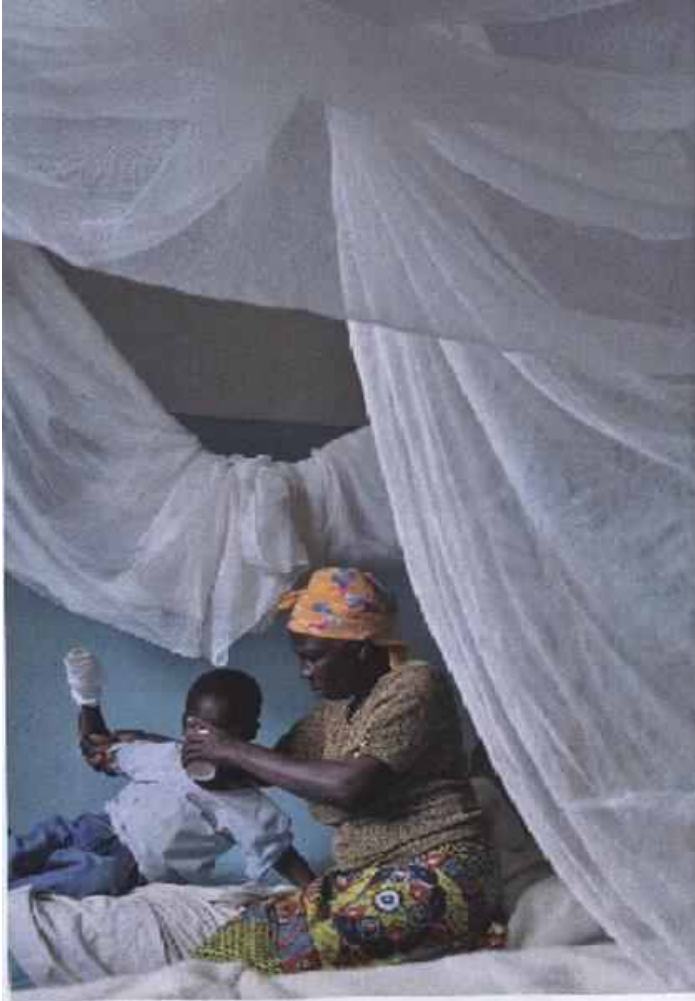

I have sent this email to 20 friends and
colleagues

If everyone buys one net

**We will have stopped
a lifetime of suffering**

for 20 children

and **saved a child's life**

If...

everyone sends this to 20 of their friends and colleagues
and if each person buys one net,
we will have saved 20 lives
and

stopped the suffering of 400 children

If this progression is done 6 times and
if everyone buys just ONE \$6.50 net

in just 24 hours

we will have prevented the

3 million deaths expected this year

from Malaria.
